* South Pittsburg, TN--AL	2,164
* Woodstock, AL	323

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Of the district's 3,280,315 total population in 2010, 13.0% was outside census-defined urban areas	Non-urban Population	Active Churches	Full Members	Worship Average	Adherents	Churches per 100,000	Members per 100,000
	425,359	6	262	234	351	1.4	62

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Areas Outside Urbanized Territory

Of the district's 5,450,705 total population in 2010, 11.8% was outside census-defined urban areas	Non-urban Population	Active Churches	Full Members	Worship Average	Adherents	Churches per 100,000	Members per 100,000
	644,241	13	939	803	1,180	2.0	146

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Fort Polk, LA	14,300

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Stewartstown, PA	4,663
Poolesville, MD	4,620
Golden Beach, MD	4,452
Harrington, DE	4,448

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Urbanized Areas with No Nazarene Presence

Urban Area	Population on District
* Waterbury, CT	190,977
* Dover--Rochester, NH--ME	80,286
* Portsmouth, NH--ME	72,303
* Torrington, CT	37,857
Lebanon--Hanover, NH--VT	25,690
Greenfield, MA	22,965
Barre--Montpelier, VT	21,675

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Urbanized Areas with No Nazarene Presence

Urban Area	Population on District
Norwalk, OH	20,806
Conneaut, OH	14,109

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Urbanized Areas with No Nazarene Presence

Urban Area	Population on District
* Iron Mountain--Kingsford, MI--WI	17,594
Ishpeming, MI	12,301
Manistee, MI	9,606
* Marinette--Menominee, WI--MI	8,570

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Urbanized Areas with No Nazarene Presence

Urban Area	Population on District
* Ardmore, OK	15,116
* Idabel, OK	5,940

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Nashville, AR	4,488
Sheridan, AR	4,458
Lonoke, AR	4,058

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

* Ozona, TX	2,873
* Brackettville, TX	2,862

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

* Alamogordo, NM	31,862

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.

Urbanized areas are periodically defined by the U.S. Census Bureau based on population size and density. Each area has a minimum population of 2,500 people and a population density of at least 1,000 people per square mile. The areas are defined without regard to political boundaries, though names are usually assigned based on population size of incorporated places. The latest delineation of population size was done based on 2010 population figures. Nazarene figures are based on 2017 assembly reports.

*Indicates another district shares responsibility for this urbanized area.
